Les bibliothèques et le Web 2.0

■ Web 2.0

- The term "**Web 2.0**" (2004–present) is commonly associated with web applications that facilitate interactive **information sharing**, **interoperability**, **user-centered design**, and **collaboration** on the **World Wide Web**. Examples of Web 2.0 include web-based communities, **hosted services**, **web applications**, **social-networking sites**, **video-sharing sites**, **wikis**, **blogs**, **mashups**, and **folksonomies**. A Web 2.0 site allows its users to interact with other users or to change website **content**, in contrast to non-interactive websites where users are limited to the passive viewing of information that is provided to them.

- “L'information devrait circuler de la bibliothèque à l'utilisateur, et de l'utilisateur à la bibliothèque, pour permettre une adaptation rapide et permanente des services.” http://biblio.wikia.com/wiki/Bibliothèque_2.0
- Cinq axes :
 - **Se promouvoir (le marketing pour aller (re)conquérir son/le public)**
 - **S'ouvrir à l'utilisateur (qu'il devienne « contributeur »)**
 - **Améliorer les outils existants (→ approfondissement des missions traditionnelles)**
 - **Délivrer de nouveaux services (→ diversification des missions traditionnelles)**
 - **Se poser en forum social (se positionner comme lieu central pour la communauté)**
